

# THE BEST SHOOTING GLASSES OF 2022

We tested shooting glasses for comfort, eye strain, and clarity

PUBLISHED MAY 12, 2022

**S**hooting glasses do two main things for you. First, and maybe the most obvious, they protect your eyes from any debris or discharge that might occur while shooting. In case you haven't heard (or seen), eyeballs are kind of important, especially when you enjoy shooting. Whether from spall flying off steel targets, ejected cartridge casings, gas blowback, or dirt and oil splatter, having a ballistically rated lens between your eyes and whatever is coming at them can make all the difference for a good day at the range. The golden age of prescription sporting lenses, with a litany of options to suit just about any activity in all light conditions. Here, then, is a selection of high-performance glasses to fit any budget.

BEST OVERALL:

## WX SABOR ADVANCED

Besides protecting your eyes, a good pair of shooting glasses can heighten your overall shooting experience. High-quality lenses give better clarity and when tinted with certain colors, give the shooter better contrast between light and dark for a faster pick up on sight picture and targets whether you're shooting pistols or rifles.

### KEY FEATURES

- **Weight:** 0.8 pounds
- **Materials:** Selenite Polycarbonate lens, rubberized polycarbonate frames
- T-shell lens coating
- Compatible with PTX prescription insert
