

THE BEST SHOOTING GLASSES FOR YOUR NEXT TRIP TO THE FIRING LINE

Written By Scott Murdock
Published Oct 12, 2021

Protecting your vision should be one of your top priorities. It doesn't matter if you're in combat, riding a motorcycle, or trimming the weeds in your yard — one piece of debris hitting your eye with enough force can cause lifelong vision impairment. Traditional sunglasses don't do enough to protect your eyes, and at their worst they can actually break and turn into shrapnel on impact. You can protect your eyes with a pair of ballistics glasses, and there are plenty of options available for everyday use. These days, you can find reputable manufacturers that offer ballistic glasses designed to be tactical, stylish, or a close enough match to replace the eye-pro that was destroyed in a firefight and now some civilian contractor at supply wants you to reimburse them out of pocket (not that we're bitter or anything).

SABER ADVANCED

Wiley X has been a major player in the ballistic glasses market for years, and they continue to build on their success with the Saber. These minimalist glasses are designed to be lightweight and provide a wide angle of view unimpeded by bulky frames. Get a perfect fit with the flexible nose piece and removable foam padding for the lenses. One-piece lenses meet military ballistic standards, are coated to block ultraviolet light, resist scratches, and are shaped to offer maximum optical clarity. You can even fit prescription lenses to these frames. Each pair comes with gray, orange, and clear lens options that can be switched out in seconds. These glasses come with a cleaning cloth, retention strap, and hard clamshell case.

SABER ADVANCED

ANSI Z87.1+ BALLISTIC RX INSERT

Ready for action and virtually indestructible, the WX Saber is the model that helped establish Wiley X as a ballistic-eyewear powerhouse. From its aggressive, semi-rimless presentation to adjustable telescoping temple arms, the WX Saber both looks and acts the part of the ultimate protector. Available in one, two, and three-lens kits, the easily changeable lenses let you adjust to varied lighting and conditions, while an adjustable wire-core nose-piece and foam insert assure a customized and slip-free fit in even the most extreme environments.
